IMPORTANT NOTES:

Bomanite Broadcast Aggregate System consist of decorative and/or industrial aggregates encapsulated in high performance, two-component primer, body and topcoats. The base of design process utilizes Bomanite Florspartic 100 however certain project specific criteria such as exterior applications, moisture suppressing requirements, gloss level and service use may influence the selection of a different Bomanite coating. Consult with your local Bomanite Toppings Licensee or Bomanite Technical Services for information on the high performance coatings appropriate for your particular application. For a complete listing of the Bomanite High Performance Coatings, visit www.bomanite.com/toppings/crossreference.

Standard aggregate blends in standard gradations are pictured. Custom blends and gradations are available upon request. Unique aggregates such as recycled glass and natural sands or ceramics may be utilized to create custom floors and walks. Consult with your local Bomanite Licensed Toppings installer for additional information on custom aggregate blends and unique aggregates.

It is strongly recommended that samples be created, viewed and approved using construction techniques and materials identical to those that will be used in the actual construction of the project. This sampling process must be completed prior to specifying the final color and appearance.
